

CHEMZ *Zinc Black*

Part No. 7554 (400ml)

Zinc rich protection coating for bare metal

- Black film contains Zinc components
- Quick drying single component product
- Provides resistance to corrosive environments
- Dries to semi-gloss finish

Chemz Black Zinc is formulated to refinish damaged and /or repaired hot dipped galvanising and spot welding

Chemz Black Zinc provides excellent adhesion to all metals and provides long term corrosion protection

Chemz Black Zinc provides the ultimate protection when used as a finishing coat for Chemz Zinc code 7533

Chemz Black Zinc can be used on steel frames, tank stands, gates, trailers, farm machinery, home and garden equipment and general engineering use

Chemz Black Zinc is best applied to clean dry surfaces. Remove any loose scale with a stiff brush or scraper. If needed clean and prepare surface with Chemz Electro Clean (7125) or Chemz Z7 Brakeclean (7816).

Technical Data

Appearance	Black liquid spray
Dry to touch	30 minutes
Complete cure, 20°C	24 hours
Temperature resistance, °C	Up to 120
Flashpoint, °C	<0 (Hydrocarbon propellant)
Propellant	Hydrocarbon
Clean up solvents	Mineral turpentine or white spirits
Re-application period	Up to 3 years or as required

MPI Approved C23 (All animal products except dairy)
