

Technical Data Sheet

CHEMZ Graphite SPL

CMZ7455 500ml

Track and rail switchplate lubricant

- Contains graphite to reduce wear
- Rain and corrosion resistant
- Extreme pressure and anti-wear properties
- Temperature Range -30°C to +140°C

Chemz Graphite SPL is a specially formulated lubricant for use on Switchplates in the rail industry.

Chemz Graphite SPL offers a tough durable and long lasting lubricant which leaves a highly tenacious thin film.

Chemz Graphite SPL resists rain wash off and can be applied to wet Switchplates, the powerful spray will remove excess water.

Chemz Graphite SPL provides long lasting corrosion protection, resists contaminants and can be used on a wide range of temperatures.

Chemz Graphite SPL fits into the upside-down applicator for ease of use.

Technical
Information:

Colour	Dark grey liquid
Odour	Hydrocarbon solvent
Density	0.75 g/cm ³
Vapour Density	Heavier than air
Co-efficient of Friction	Low
Evaporation	Medium fast drying
Solids	> 30%
Type of Film	Dry film
Flash Point	< 0 °C
Propellant	Hydrocarbon
