

Technical Data Sheet

CHEMZ Lanoshield

CMZ7755 (500ml / 400g)

Heavy duty natural lanolin protection

- Controls salts & fresh water corrosion
- Non-conductive, non-static & non-toxic
- Combats rust, electrolysis & vertigris
- Lubricates moving parts
- Does not dry out or wash off with water

Chemz LanoShield is a natural lubricant with lanolin protection against the effects of salts, alkalis and acids giving long term corrosion protection.

Chemz LanoShield through its natural ability is water repellent and therefore effective at protecting metals from rust corrosion in extreme climate conditions.

Chemz LanoShield preserves and conditions metal, timber, leather, rubber, vinyl and plastics. Seams can be waterproofed in tents, tarpaulins and boat canopies.

Chemz LanoShield can be used as a thread anti-seize and preventing dis-similar metals galvanising.

Chemz LanoShield is free of acids, silicones, kerosene, copper and lead.

Chemz LanoShield will not harm metals, plastics, paints, fibreglass, rubber or neoprene.

Technical
Information:

Appearance	Amber liquid spray
Odour	Wool fleece
Temperature Range, °C	-20 to 60
Flashpoint, °C	<0 (Hydrocarbon propellant)
Vapour Density, (Air = 1)	>1
Solubility in Water	Insoluble
Propellant	Hydrocarbon

MPI Approved C12 (All animal products except dairy)
