

Technical Data Sheet

CHEMZ RW Cleaner

CMZ7155 500ml

Heavy duty industrial and electrical equipment cleaner

- Low toxicity – safe to use – contains no CFC's
- Fast Drying - residue free
- Removes oil, grease, contamination
- Powerful jet action spray nozzle
- Harmless to plastic & rubber
- Can be used on parts without disassembly

Chemz RW Cleaner is a specially formulated heavy duty cleaner for removing contamination in the engineering and electrical equipment fields.

Chemz RW Cleaner formulation rapidly removes grease, grime, oils, waxes, silicones, moisture, fats and other contaminants that cause current leakage and electrical inefficiencies.

Chemz RW Cleaner is a powerful general parts cleaner for use on clutches, brakes, chains, cables, wires, motors, forklifts, industrial machinery, air conditioning units and trade tools.

Chemz RW Cleaner is the ideal cleaner for electric motors, high voltage switch gear, alarms, bus bars, air tools, generators, starter motors, relays, contacts, transformers, circuit breakers, coils and controls.

Technical
Information:

Colour	Clear, colourless
Odour	Slight hydrocarbon/ethanolic citrus solvent odour
Density at 25°C	0.80 g/cm ³
Surface Tension	22 Dyne/cm
Vapour Density	Heavier than air
Evaporation	Medium fast drying
Residues	None
Material Compatibility	Good. Safe on most plastics.
Flash Point	< 0 °C
Flammability	Highly flammable. Do not use on energised equipment.
Propellant	Carbon dioxide

MPI Approved C12 (All animal products except dairy)
